

MITCHELL GARMAN ARCHITECTS

FIRM AWARD

Presented by AIA Dallas

The AIA Dallas Firm Award is bestowed upon a company that has demonstrated an outstanding commitment to design, practice, community, and professional services.

Mitchell Garman Architects started in 2007 when Kelly Mitchell, AIA launched as a sole practitioner, building a name for herself in the world of chef-driven restaurants, as well as custom homes. In 2013, Sean K. Garman, AIA left the corporate world and joined as her partner.

Kelly and Sean are just as committed to their profession as they are to their firm with both having served on various committees and Board positions at AIA Dallas and the Texas Society of Architects. Engagement in design, advocacy, policy, preservation, mentorship, and the community are valued pursuits that extend beyond the day to day running of a small practice.

Mitchell Garman Architects is a design-centered practice with acute interest in restaurant design, custom single family residential, and bespoke commercial projects. Their focus on intimate spaces, lighting, and clarity of materials creates honest, warm environments for modern living. Their work has been published extensively, and they have showcased residential projects on the 2007, 2009, 2013, and 2016 AIA Dallas Tour of Homes. Mitchell Garman Architects strive to create unique places that are both inviting and personal.
